

HOW MUCH OF ONBASE ARE YOU USING?

Imagine using your phone — but just for calling.
Or your computer — but only for word processing.
How about your TV — to watch just three channels with no input of what’s airing.

OnBase, Hyland’s enterprise information platform, is like any of those technologies: The more you learn about what it can easily do, the less you want to live without the full experience. By leveraging the OnBase platform you already own, you make a safe bet on a low-code platform that:

- Reduces reliance on legacy systems
- Brings agile adaptivity to your business processes
- Allows developers and citizen developers to innovate and expand intelligent automation in any division
- Enables better end user and customer experiences

Not sure where you can go with OnBase? Let’s see what you’re missing. »

“Every time I think of something — ‘you know, it’d be really cool if I could do this in OnBase Studio’ — and I go to look, and it’s already documented. Hyland has already thought of it. I don’t have to do custom coding.”

Barbara Ebel-Langdon
Senior Application Development Analyst
Priority Spectrum Health

Hyland

DO YOU USE ONBASE'S LOW-CODE SOLUTIONS TO:

Accounting and finance

- Shorten payment and invoice cycles
- Improve cash flow management
- Replace inefficient spreadsheets

Human resources

- Review employee compensation data in a central view and export it directly into your payroll system
- Increase governance around drug tests and regulatory reporting
- Automate employee onboarding and management of separations checklists

Purchasing

- Track and manage supplier information
- Provide views into planning for the goods and services third parties provide
- Manage the entire rebate process, from consumer use to the vendor's accounting department

IT

- Create electronic forms to standardize the IT service and request process
- Equip IT staff with the content they need to effectively respond to service requests
- Centralize and track all of the information related to a single request in real-time

Customer service

- Assign and manage tasks to handle interactions
- Provide visibility into the resolution
- Offer self-service reporting capabilities with real-time insights

Sales

- Monitor the sales pipeline
- Manage bidding qualifications
- Add value through project management

Legal

- Bring visibility to case management and issue tracking
- Manage the contract lifecycle
- Automate approval, routing and escalation tasks

Administrative/management

- Track and assign all meeting and event requests
- Integrate with calendar applications like Microsoft Outlook
- Automate the retention and destruction of business records

Your OnBase solution can be expanded and applied anywhere. Are you using the low-code capabilities of OnBase to:

- Fill the gaps and/or connect core line-of-business systems
- Shorten the line for IT requests
- Shift employee focus from manual-based tasks to higher-value, customer-focused tasks
- Eliminate the need to learn multiple niche applications
- Minimize the need to jump between electronic and physical storage to search for information, even for projects spanning multiple facilities
- Support compliance efforts
- Replace antiquated methods of managing content
- Manage all the documents associated with vendors in a single, centralized location
- Minimize risk with increased security and control over sensitive content
- Automate predictable processes

This isn't an exhaustive list — not even close. Your OnBase solution can be leveraged in countless ways through the creativity, innovation and needs of your team. One solution, countless applications.

Learn more in the ebook, *Using what you have: 43 ways to leverage OnBase's low-code capabilities across your enterprise.*
